We’re a company that takes on the toughest health
challenges. But we do more than treat diseases—we
aim to make a remarkable impact on people’s
lives. We are AbbVie, a highly focused research-
driven biopharmaceutical company. Our ~30,000
employees are scientists, researchers, communicators,
manufacturing specialists and regulatory experts
located around the globe. We come up with new
approaches to addressing today’s health issues—from
life-threatening illness to chronic conditions. We
target specific difficult-to-cure diseases where we can
leverage our core R&D expertise to advance science.
We're constantly working to create solutions that go
beyond treating the illness to have a positive impact on
patients’ lives, on societies—and on science itself. At
AbbVie, we see a future full of possibility, where health is
in reach and patient lives are improved.

Driven by innovative science and our entrepreneurial culture, we are focused on the delivery of life-changing medicines that are fuelling growth and contributing value to patients and society. We have transformed our pipeline and returned to growth and, as a result of continued pipeline delivery and commercial execution, we are now entering a new stage of our journey. This is focused on enhanced science and the delivery of life-changing medicines that contribute value to patients and society. The fundamentals of our strategy are clear. We focus on innovative science and leadership in our three main therapy areas: Oncology; Cardiovascular, Renal and Metabolism; and Respiratory diseases. Backed by a global presence, with strength in Emerging Markets, particularly China, we have a portfolio of specialty and primary care medicines. At the same time, the world around us is changing and the burden of disease is increasing. We are responding by increasing our focus on growth through innovation—being more patient-centric, doing more with technology, digital and data, and advancing more cutting-edge science.

Avoca Consulting & Search, LLC

St. Louis, MO 63119
avocasearch.com
Contact: Brian McCartie / 314.264.0571 / bmccartie@avocasearch.com
Our focus is a unique combination of executive search, interim management and consulting. The consulting firms we have had experience with are only as good as the consultants they are able to recruit and retain, while search firms often lack the boots on the ground experience of the roles they search for and place. Given the combination of our experience, we are able to offer our clients a more consultative and cohesive approach to filling key roles whether permanent, interim or project based. Executive Search: Our sweet spot is the Director/VP level. We have national experience and work throughout the continuum of health care. Interim Management: We provide seasoned executives for a fixed period of time in leadership positions nationwide. Management Consulting: We are focused on operations of the physician group, whether it’s integrated or independent. We complete assessments that look at Revenue Cycle, Coding, Compensation redesign, work flow analysis and physician culture.

CMAC Partners is a boutique firm with a single niche—to solve challenges surrounding physician-owned medical real estate. Our team, in existence for over 15 years and led by a former Wall Street banker, has developed the expertise to analyze data and generate leverage. Our client and industry partner relationships allow us to work with and deliver results to hundreds of private medical practices across the country. CMAC secures over half a billion dollars annually for our medical real estate clients, helping them to stay independent and in control. We do not seek to purchase or sell medical real estate. As an advocate for the physician, we give clients the tools and knowledge to strengthen their practices. CMAC's objective is to ultimately demonstrate the value of physicians having ownership in their medical real estate.

980 North Michigan Avenue, Suite 1998
Chicago, IL 60611
cpfounders.com
Contact: Matthew Doyle / 312.273.4750 /
mdoyle@cpfounders.com
Chicago Pacific Founders ("CPF") was established to serve as an investment advisor that manages private funds and partners with companies that we believe are positioned to lead innovations in healthcare delivery and in caring for aging populations. CPF primarily focuses on growth companies in targeted sectors where the fund can contribute significantly beyond its capital. Whereas the vast majority of investment in health care has historically been deployed in the domains of drugs, devices, and diagnostics, we are primarily focusing on care service delivery, which represents the "other" eighty percent of the $3 trillion annual healthcare spending in the United States. The Managing Partners along with founding operating partners shared a belief that the most significant societal impact and investment returns from health care for the next decade will be generated by investment in delivery model innovation.

Dexcom, Inc manufactures Real-Time continuous glucose monitoring (RT-CGM). This advanced glucose monitoring technology measures interstitial glucose levels and displays the current blood glucose level and direction and rate of change. This complete picture of glycemic activity helps guide disease management decisions (e.g., insulin dosage adjustments, changes in diet) to avoid glycemic excursions. For patients with hypoglycemia unawareness, the alarm function of RT-CGM devices may be their only warning of emerging hypoglycemia.

IDx is a leading AI diagnostics company on a mission to transform the quality, accessibility, and affordability of health care. Founded in 2010 by a team of world-renowned clinician scientists, the company is focused on developing clinically-aligned autonomous algorithms that detect disease in medical images. By enabling diagnostic assessment in primary care settings, IDx aims to increase patient access to high-quality, affordable disease detection. The company’s first product, IDx-DR, is an FDA-cleared AI-based diagnostic system designed for use at the front lines of care to detect diabetic retinopathy. IDx-DR is intended for use by healthcare providers to automatically detect more than mild diabetic retinopathy in adults (22 years of age or older) diagnosed with diabetic retinopathy who have not been previously diagnosed with diabetic retinopathy. IDx-DR is indicated for use with the Topcon NW400, an easy to use and highly accurate robotic fundus camera.
